Hello Mark,

       Headquarters has sent an EC out to all offices sayings it's okay to send Okbomb files to OKC. So the files are coming back with guess what Original 1As that I have never seen. 1As that all offices were suppose have sent in back in December 1996 or early 1997.   has told us to send back the 1As to the offices because we are not to get any evidence with these files. My concern is this is a big Discovery problem since we told the defense they have seen everything. The 2 offices we received 1As from so far is Miami & Birmingham. I glance at the 1As and they are Photos, NCIC printout, etc. I didn't really want to know because if I don't really see them then I can plead ignorance on the subject.

       Also Birmingham has the Time Line Indexed in there file. Which also can up as a Discovery concern too. I don't think this will be a problem but I thought it was weird they had copies of it. I figure you can tell Danny about this little problem. I have not contacted Sean about this.

       So what do you think would be best way to handle this situation?

Linda
